技术规格

Background:	This gene is a member of the telombin family and enco des a nuclear protein involved in telomere maintenance. Specifically, this protein functions as a member of a mul ti-protein complex that binds to the TTAGGG repeats of telomeres, regulating telomere length and protecting chr omosome ends from illegitimate recombination, catastro phic chromosome instability, and abnormal chromosome segregation. Increased transcriptional expression of this g ene is associated with stomach carcinogenesis and its pr ogression. Alternatively spliced transcript variants have b een described.
Applications:	ELISA, IHC
Name of antibody:	POT1

Immunogen:	Fusion protein of human POT1
Full name:	protection of telomeres 1
Synonyms:	CMM10; HPOT1
SwissProt:	Q9NUX5
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and human esophagus cancer
IHC Recommend dilution:	25-100
